### THE WEEK AHEAD

Markets for all classes of cattle continue to move along positively while demand is outstripping supply. The weather continues to get buyers on their toes with disruptions across most districts of southern Queensland. TC Kirrily continues to provide BOM with multiple questions of where its going next? Unfortunately, they have a much of a clue as you or me! It would be handy if it does swing south as most of the rain across the Maranoa and Warrego has been storms. Beneficial, though very scattered. We'll all be mush wiser by the middle of next week. If I win lotto tonight don't wait for next week's report.
